## Introduction

I am a professional with maturity and resilience, I know how to solve problems and work with the team to achieve the proposed goals.

Currently, I work as a full stack developer using Laravel and NodeJs.

I have developed and still develop projects to study and improve my technical skills, they are all on my GitHub.

## Education

- Bachelor in Business Management – PUCPR

## Certifications

- EF SET English Certificate C2 Proficient
  - <https://www.efset.org/cert/w6CWBr>
- freeCodeCamp JavaScript Algorithms and Data Structures
  - <https://freecodecamp.org/certification/samuelb7/javascript-algorithms-and-data-structures>
- Rocketseat NodeJs Certificate
  - <https://app.rocketseat.com.br/api/certificates/pdf/632aa1e8-8d3f-4e62-8bb7-52ce75a84034>

## Work History

- **2010-2012:** Apprentice at ESPRO-PR.  
Activities: Administrative assistant, helping with various day-to-day tasks.  
(typing and transporting documents, organizing files, etc....)
- **2013-2015:** Intern at Bosch Curitiba.  
Activities: Audit/Internal Control, carrying out internal controls in fixed assets, inventory, sales, escort of goods, store for employees, and in various areas of the factory where these controls were applied, and I worked on reporting the results of these internal controls to the center in Germany.

- **2017-2019:** Testing Assistant at Paraná Metrologia.  
Activities: Provision of inspection services to the government in the metrology area. Assist in carrying out inspections at gas stations, scales, tachographs, radars, and taximeters.  
Assist in the issuance of infraction notices for those responsible for the equipment and assist in the issuance of tachograph certificates for the owners of the equipment.
- **2020:** IT support intern at Softmanager.  
Activities: I worked in IT support, helping customers to solve technical problems in the company's software.
- **2021:** Junior Developer at TI360 Soluções em Tecnologia da Informação.  
Activities: Development of websites and systems for several clients, using Laravel and Angular.
- **2022:** Full Stack developer at Lyx Participações, currently working on an internal software for management of construction works.
